INTERIM REPORT OF THE MEDICAL OFFICER  
OF HEALTH FOR THE YEAR 1941.

---

September, 1942.

TO THE CHAIRMAN AND MEMBERS OF THE  
URBAN DISTRICT COUNCIL OF WHITEFIELD.

Gentlemen,

I have the honour to present the third interim report on the health and sanitary conditions of the District. Again the Ministry of Health have suggested that reports should be confined to essential and urgent matters which have affected the Public Health during the year.

SECTION A.—GENERAL SUMMARY.

There has been no change in the general provision of health services for the district.

Excellent progress has been made in diphtheria immunisation. By the end of the year sixty per cent. of the children under five years of age and sixty-eight per cent. of those between five and fifteen years of age had been protected against diphtheria.

There has been a war-time increase of scabies but it has not been necessary to institute any additional measures for its control apart from visits to the homes of known cases.

Table I. - STATISTICAL SUMMARY.

Area—3,261 acres.

Population—Registrar General's estimate of:—  
resident population mid 1941 ... 12,170

No. of inhabited houses, according to Rate Books at the end of 1941—4,169.

Rateable Value 1941—£78,477.

Sum represented by a penny rate 1941/42—£310.

Table II. - VITAL STATISTICS, 1941.

			Total	M.	F.	} Birth-rate per 1,000 of the estimated resident population—12.3.
Live Births	Legitimate ...	146	74	72		
	Illegitimate ...	4	3	1		
	Total ...	<hr/> 150	<hr/> 77	<hr/> 73		

Still Births ... 8 4 4 Rate per 1,000 total (live and still) births—50.6.

Deaths (all ages) ... 134 74 60 Death rate per 1,000 of the estimated average population—11.0.

Deaths from Puerperal Causes :—

Puerperal Sepsis ... Nil.

Other puerperal causes Nil.

Death-rate of infants under one year of age :—

All infants per 1,000 live births ... 46.6

Legitimate infants per 1,000 legitimate live births ... 47.9

Illegitimate infants per 1,000 illegitimate live births ... Nil.

Deaths from Cancer (all ages) ... 21

„ „ Measles (all ages) ... Nil.

„ „ Whooping Cough (all ages) ... Nil.

„ „ Diarrhoea (under 2 years of age) ... Nil.

Table III. - CAUSES OF DEATH DURING 1941.

## CLASSIFIED LIST OF CAUSES.

							<hr/>	<hr/>
All Causes:-							74	60

TOTAL ... 134.

## SECTION B.—GENERAL PROVISION OF HEALTH SERVICES FOR THE AREA.

There has been no important change in these provisions during the year.

The following pathological and bacteriological examinations were made during 1941 :—

- (1) Diphtheria, 21.
- (2) Enteric Fever, 4.
- (3) Milk (a) Biological, 20—2 found to contain tubercle bacilli.  
(b) Bacteriological, 29—9 found to be unsatisfactory.
- (4) Water (a) Bacteriological, 3—3 satisfactory.

**AMBULANCE FACILITIES.**—The Council have their own ambulance and full-time driver.

Reciprocal arrangements also exist with the adjoining Boroughs of Radcliffe and Prestwich.

547 calls for accident cases and private removals were received during the year compared with 340 during 1940.

## SECTION C.—SANITARY CIRCUMSTANCES OF THE AREA.

No changes have occurred in connection with the water supply and sewerage system.

A detailed statement of inspections by the Sanitary Inspector is appended.

## SECTION D.—HOUSING.

Defects which have been found or notified have received attention. Action was taken in respect of two houses under Section II of the Housing Act, 1936 which deals with individual unfit houses. Six houses were found to be verminous and were disinfested.

## SECTION E.—INSPECTION AND SUPERVISION OF FOOD.

### MILK SUPPLY.

- (a) Licences.—The following licences under the Milk (Special Designations) Order 1936 and 1938 have been issued:—

Tuberculin Tested Milk	(1) Bottling .....	Nil.
	(2) Distribution .....	1.
Accredited Milk	(1) Bottling .....	Nil.
	(2) Distribution .....	1.
Pasteurised Milk	(1) Bottling .....	Nil.
	(2) Retail Distributors .....	10.

- (b) Dairies, Milk Shops.—There are 55 milk purveyors other than cow-keepers. Regular inspections of the premises were made during the year.

- (c) Farms.—There are 18 dairy farms and 275 cows in the district. All the farms in the district were inspected monthly with a view to cleanliness, lime-washing and structural condition. The cleanliness of the cows and the milkers was also watched, together with methods for sterilising the utensils, cooling, bottling and sterilising the milk.

- (d) Samples.

- (1) For tuberculous milk—29 samples—3 contained tubercle bacilli.
- (2) For bacterial content—  
29 samples—9 unsatisfactory.

**MEAT SUPPLY.**—All local slaughter-houses ceased to be used on Sunday midnight, the 14th January, 1940.

Because of the rationing, the meat supply and distribution became centralised and there is now very little local slaughtering. It is still very necessary to inspect meat coming into the shops.

23 lbs. were surrendered during the year as unfit for human consumption.

**SUSPECTED FOOD POISONING.**—Three cases were reported during the year. Each case was investigated, no outbreak developed, and there did not appear to be any definite cause for these isolated cases.

**BAKEHOUSES, FOOD SHOPS, FISH FRYERS, AND MEAT SHOPS.**—Routine inspections have been made of all the above premises throughout the year. A detailed statement of various foodstuffs found to be unfit for human consumption is given in the Sanitary Inspector's report.

## SECTION F.—PREVALENCE OF, AND CONTROL OVER, INFECTIOUS DISEASE.

There was no undue prevalence of infectious disease during the year.

There were 3 diphtheria and 15 scarlet fever cases during the year, compared with 6 diphtheria and 6 scarlet fever cases in the previous year.

Five cases of enteric fever occurred, in one case the infection was acquired whilst away on holiday and no source of infection could be ascertained in respect of the others.

Table IV.

Disease	Total cases notified	Cases admitted to Hospital	Deaths

**DIPHTHERIA IMMUNISATION.**—The scheme was described in the report for 1940.. Excellent progress has been made and thanks are due to the Head Teachers in the district for their valuable assistance.

Sixty per cent. of the children under five years of age and sixty-eight per cent. of those between five and fifteen years of age had been immunised up to December 31st, 1941.

At the time of this report these figures had increased to sixty-eight per cent. and seventy-three per cent. respectively. It is gratifying to note the high percentage of those under 5 years of age who have been protected against diphtheria.

**PUBLIC HEALTH (TUBERCULOSIS) REGULATIONS, 1940.—**

These Regulations require particulars of all male persons of certain specified ages who have been on the Tuberculosis Register to be forwarded to the Ministry of Labour; the object is to draw the attention of the Medical Boards for enlistment in His Majesty's Forces. Several names were notified in 1941.

**SMOKE ABATEMENT.**—The regulations have been temporarily relaxed.

C. H. T. WADE,  
*Medical Officer of Health.*

SANITARY CIRCUMSTANCES OF THE URBAN DISTRICT  
OF WHITEFIELD.

Health Department,  
Town Hall,  
Whitefield.

TO THE CHAIRMAN AND MEMBERS OF  
THE URBAN DISTRICT OF WHITEFIELD.

Gentlemen,

I have the honour to present for your consideration my report on the Sanitary conditions of the district for the year ending March 31st, 1942.

During the year <sup>1045</sup>~~1045~~ premises were visited, 114 defects or nuisances were found and 89 abated, 76 informal notices and 1 statutory notice were served.

May I express to the Chairman and Members of the Health Committee, the Medical Officer of Health, Clerk to the Council, and Staff in general my appreciation of the valued assistance and co-operation shown to me during the year.

I am, Mr. Chairman and Gentlemen,

Your obedient Servant,

B. HODGSON,

*Sanitary Inspector and  
Cleansing Superintendent.*

**HOUSING OF THE WORKING CLASSES.**—During the year representation was made in respect of two houses in accordance with the provisions of Section 11 of the Housing Act, 1936.

**SECTION 62 SUB-SECTION 2.**—11 Houses were measured and certificates granted in accordance with the above section. The number of certificates granted to date is 728.

**DISINFESTATION AND ERADICATION OF BED BUGS.**—The following is a summary of the work which has been carried out during the year:—

1. (a) No. of houses found to be infested:—

Council Houses	...	...	2
Other Houses	...	...	3

(b) No. of houses disinfested:—

Council Houses	...	...	3
Other Houses	...	...	3

2. Where houses are found to be infested with vermin, the work of disinfestation is generally carried out by Contractor.

**MILK.**—During the period under consideration every attention has been given to the supervision of the production and distribution of milk supply of the district, a large number of inspections being carried out during early morning.

29 Samples were taken and submitted for bacteriological examination, 20 of which proved satisfactory, in one instance it was necessary to warn a dairyman with reference to unsatisfactory samples.

20 Samples were taken and submitted for biological examination, 2 of which proved positive and were dealt with by the appropriate authority.

**DESIGNATED MILK.**—Nine samples of milk were taken on behalf of the County Council from farms producing Accredited Milk, five of which passed the Methylene Blue test and three the Coliform test.

The nine samples were also submitted for biological examination, one of which proved positive.

**FOOD AND DRUGS ACT, 1938.**—The duties under the above Act are carried out by County Public Health Department and I am indebted to Mr. Mason, the County Sanitary Inspector for the following report of work carried out in the district:

Camphorated Oil	...	1	Cornflour	...	...	1
Lentils	...	...	Mustard	...	...	1
Self-raising flour	...	1	Pepper (White)	...	...	1
Oatmeal	...	...	Sodium			
Whisky	...	...	Bicarbonate	...	...	1

Milk 29 (including 2 in course of delivery and three Appeal to cow) samples. Two original samples of milk and two samples taken in the course of delivery were adulterated and summonses taken resulted in two farmers being fined, £2 and £5 5s. 0d. costs and £20 and £12 6s. 6d. costs.

**MEAT AND OTHER FOODS.**—General slaughtering in the slaughter houses in the district was stopped under Live Stock (Restriction on Slaughtering) Order, 1940, S. Land O. 1940 No. 41 made by the Ministry of Food which came into operation 15th January, 1940.

The following animals were slaughtered under licence granted by the Ministry of Food.

Beasts 1 (due to accident)

Pigs 13

Sheep 1 (due to accident)

The undermentioned articles of food were on examination found to be unfit for the food of man and surrendered :—

Eggs	...	...	...	...	1094
Tins of Beans	...	...	...	...	7
Tins of Rabbit	...	...	...	...	2
Tins of Plums	...	...	...	...	20
Tins of Tongue	...	...	...	...	1
Tins of Beef	...	...	...	...	1
Tins of Carrots	...	...	...	...	1
Forequarter of Mutton	...	...	...	...	18 lbs.
Beast's Liver	...	...	...	...	5 lbs.

**BAKEHOUSES.**—There are 14 bakehouses on the register, 17 inspections were made during the year and upon such inspections were found to be satisfactory.

**SANITARY ACCOMMODATION.**—The following table gives details of sanitary accommodation in the district on December 31st, 1941.

Fresh Water Closets	3955	Dry Ashpits ...	...	2
Pail Closets ...	41	Privy Closets	...	52
Dust Bins ...	4211	Privy Middens	...	29
Waste Water Closets	128			

**PUBLIC CLEANSING SERVICE.**—The subject matter of this section of the report deals with the year ending March 31st, 1942, as distinct from the rest of the report which is for the year ending December 31st, 1941.

The work of the Department has gradually increased during the period under consideration, this increase being due to the National Campaign for Salvage.

Every effort has been made to keep before the public eye the importance of salvage, and I feel that the results achieved as shown by the tables are satisfactory.

The Salvage of Waste Materials Order with regards to Waste Paper was a means of increasing the weight of paper collected and only in a few instances has it been necessary to draw the attention of householders to the requirements of the Order.

The appeal for Salvage Stewards did not meet with the response desired, the number enrolled to date being 86, nevertheless those who have taken on this important work have carried it out with very beneficial results and to them thanks are due.

Though, I have said earlier in the report that the results achieved are satisfactory it must not be thought that I am satisfied altogether as with some materials such as bones there is room for improvement.

The following table gives details of work done during the year ending March 31st, 1941.
